

ColorMaster

- Non-corrosive ink repelling urethane material for easy wash-up.
- Sealed extruded air bladder.
- Two consecutive tool-less blade retainers make for easy blade change and less maintenance.
- End Dams are designed to allow the ink cavity to fill sufficiently and allow the ink to flow off the ends of the doctor bar into the ink return pan supplied by SUN. The unit is equipped with ink deflectors to eliminate ink splatter and reduce clean-up.
- Custom extruded bladder frame eliminates warp and maintains rugged stability.
- SUN's unique bottom hinge design ensures the UHMW blade will be the only material coming into contact with the Anilox Roll.
